## (54) TELEVISION RECEIVER

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide the television receiver by which an electronic program guide is surely received and in which waste of power is avoided.

**SOLUTION:** The power supply routes are divided into small groups and power supply to a tuner 2 and a signal processing circuit 4 is not always made and after it is discriminated that a broadcast time of an electronic program guide comes, or after the broadcast is actually made, or pay program registration is detected, the power is supplied. When the broadcast of the electronic program guide is detected, a control section selects a switch to execute power supply to the tuner 2, a VIF/SIF 3 (a signal processing circuit in which a time to receive the electronic program guide is set and a reception signal selected by a tuner is processed) and a video signal processing circuit 4.
